Comprehension or Topic Question Task

TASK TITLE	Looking at the physical geography Of Europe	Week Beginning	27th April

INSTRUCTIONS

This is an online book, which lets you examine the physical nature of the land. Look specifically at the land formation in the UK and France. Can you spot the higher land? The rivers? The major cities? Specifically try to out Manchester and Paris. You may want to look on Google Earth and see if you can spot the same features.

QUESTIONS

1) **P 6/7 shows you the major rivers in Europe. Research the five longest rivers in Europe, their length and the countries they pass through.**

2) **Look at the major cities in Europe on p 8/9. How many capital cities and their countries can you can you name? I will post a 10 question quiz on Seesaw to check on your progress.**

3) **P10/11 shows you the physical landscape of the UK.**
Estimate what percentage of Scotland is mountainous.

4) **Pick out Manchester on the map on p 16/17. Why do you think that it gets so much rainfall? Which other major cities is it near to?**

5) **Look at pages 18/19. Look at where London is located on the map. Why do you think tht it so rapidly into such a large, sprawling city? Give three reasons.**

6) **Move to p26/27. Here is the landscape of France. Where are the mountains located? Why are some in darker brown. Try to pinpoint Mount Blanc and research its height in m.**

7) **P 28/29 shows you the major cities in France. Which one would you most like to visit, looking at its loction and why?**

8) **Extension: Use google earth to look at some cities in more detail.**
Make a comparison page between the UK and France. You may want to look at population, climate, landscape
