

Design a Paper Aeroplane

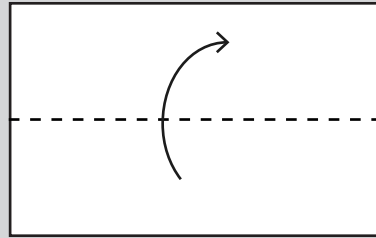

Here is a basic design for a paper aeroplane. Can you adapt it to make a faster model?

1

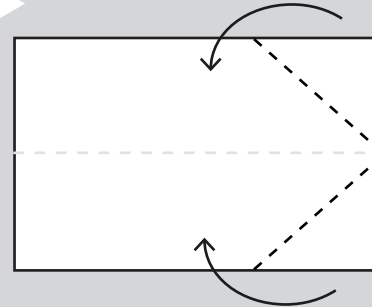

You will need a piece of A4-sized paper.

2

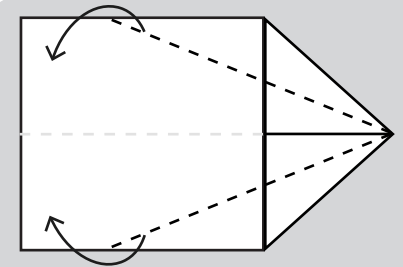

Fold the paper in half longways then opening it out flat.

3

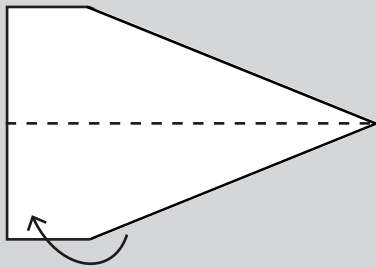

Fold in two of the corners so they meet at the centre fold.

4

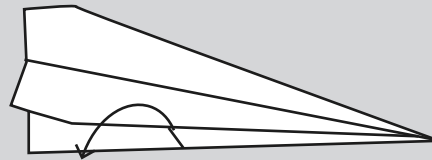

Fold the outer edges in again to meet at the centre fold.

5

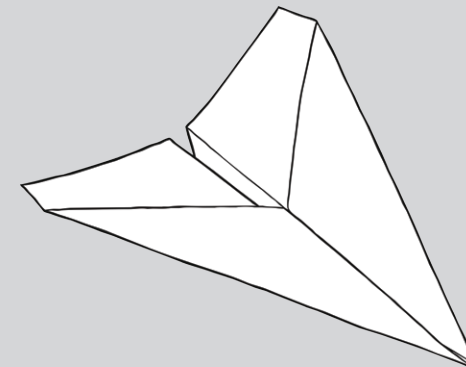

Turn the paper over and then fold it in half in the middle.

6

Fold down the wings on each side so that they meet with the bottom of the plane.

7

Your plane is ready to fly! How far can you make it go?

8

Check who has designed the best aeroplane by testing which one can fly the farthest!

Remember to make it a fair test by throwing the paper aeroplane from the same place each time.
