

÷ 100

$$100 \div \text{green circle} = \text{orange triangle} \times \text{blue square}$$

Have a think

$$100 \div \text{blue square} = \text{blue square}$$

$$100 \div \text{orange triangle} = \text{blue square} + \text{blue square}$$

$$100 \div \text{yellow star} = \text{blue square} + \text{blue square} + \text{orange triangle}$$

What is the value of each shape?

Here are some 100 squares for you to cut into equal parts.
