

- 1 In which month is the lowest temperature in Rio de Janeiro?
- 2 When does the highest temperature occur?
- 3 What do the red and blue lines indicate?
- 4 If you were to visit in December, what would you need to pack?
- 5 What's the difference between the highest and lowest temperatures in June?
- 6 Why do the temperatures lower in June, July and August (the opposite to what happens in the UK)?
- 7 Why don't the temperatures fall sub-zero?

What do you learn from the graph about the pattern of rainfall in Rio de Janeiro?

How does this amount of rainfall promote the rainforest biome in this area?

Use a calculator to find the mean(average rainfall) for the area.

* Hint : add all the amounts and divide by the number of months.
