

TRUE OR FALSE?

Cut out the cards and read the statements.

Then sort them into three groups: 'True', 'False' or 'Not sure'.

1 In a dark room you cannot see anything.

2 Light always come from a light source.

2 Cats can see in the dark.

3 We cannot see things if there is no light.

4 We see things because light is reflected from objects and travels to our eyes.

6 The sun and electric lights are light sources.

5 We see things because light travels from our eyes to the objects.

6 You only find light in bright places.

7 In a darkened room you will be able to see after a while because your eyes will adjust.

8 Shiny things reflect light better than dull black objects do.
